### DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

As this house is the central unit of the group of seven, it has been given extra elaboration above the second floor.

The stoop and entrance vestibule on the right appear again. There is a single flat arched grilled cellar window which is under the central window of the first floor group of 3, (one wide flanked by 2 very narrow, each with flat splayed arch). The double doored entrance with transom also has a flat splayed arch.

There are three regularly spaced windows with slab lintels on the second floor. Like the other one-over-one windows within the stone walls they have sills in low relief. There is a segmental relieving arch above them.

The stone wall is higher on this house than on the others and is interrupted by a hipped roof dormer with a pair of one-over-one windows, each topped by a transom. The corners of this hipped roof dormer are chamfered and have bracketed detailing. The higher cornice and greater elaboration give the roof of this central house some emphasis as a pavilion. Two small hipped dormers each with a one-over-one window perch high on the roof flanking the central dormer.
